Covid-19 : A Big Threat To The World in Socio, Economic Perspective

Introduction : The outbreak of Covid - 19 pandemic all over the world has disturbed the political , social , economic, religious and financial structures of the whole world. The Covid -19 outbreak is detrimental to all the sections of society. World's topmost economies such as the US, China , UK, Germany, France, Italy, Japan and many others are on the verge of collapsing. It has also sparked fear of an impending economic crisis and recession. Social-distancing, social-isolation and travel restrictions forced a decrement in the work force across all economic sectors and caused many jobs to be lost. Schools have closed down, and the need of commodities and manufactured products has decreased.
